

Online Stock Traders in Kansas City Diversify Portfolio Investing in REITs

Real Estate Investors enjoy high returns and financial security investing in Real Estate Trusts

Kansas City, KS – The newly launched website, ReitBuyer.com offers new opportunity for real estate investors to research REITs. Spokesperson, Earl E. Bird, III was recently interviewed and he explained the advantages to investing in REITs.

Earl said, “Commercial real estate investing is financially out of reach for many individuals. REITs were created by Congress to enable smaller investors to invest in large-scale, income producing real estate.”

When asked, “What are REITs?” Earl answered, “REITs are corporations that own and manage a portfolio of income-producing real estate and mortgages of which anyone can purchase shares.

The next question we asked Earl was “What are the advantages to investing in REITs?” Earl answered, “REITs provide diversity and liquidity; they are easy to sell quickly. Investing in a portfolio rather than a single property reduces your financial risk. Dividends tend to be larger because a REIT must distribute at least 90 percent of its taxable income to shareholders each year.

Earl explained the different types of REITs that are available, how they work, and their individual benefits. “REITs offer the benefit of diversity and liquidity, relatively larger dividends and relatively low financial risk,” said Bird.
